iDitch

iDitch has all that's essential for designing and implementing your ditches. The most intuitive and intelligent ditching software you will find on the market today. With everything on one screen and at your finger tips, you will be creating new and improving existing ditches in super fast time.

Surface drains made easy

iDitch has all you need for designing and implementing your ditches

iDitch features and tools

- Surveys drains in either direction
- Imports tci project files & SWP Ditch Tracks
- Linear & Best Fit Drain design tools
- Imports KMZ background images
- One screen operation
- Export the driven drain lines as guidance lines to Save to your hard drive or Upload to JDOC
- Enable Per pass cut and enter the depth to cut per pass.
- Choose the pass to cut using Up and Down arrows
- Edit drain line by selecting start point and end point
- Choose to trim points from the ends or bridge points
- Markers can be added during surveying or implementation
- As Applied tracking shows work in progress

Benefits

- Minimal earth moved to achieve the same water movement outcome.
- Savings in fuel, equipment, labor and time.
- Improved drainage efficiency and irrigation opportunities.
- iDitch can be upgraded to our other landforming packages at any time for more features and functionality.
- Export guidance lines for automatic steering (John Deere AutoTrac™ required)

Support

T3RRA iDitch is supported by the best service and support organization in agriculture - the John Deere dealer network.

About T3RRA
