T3RRA Survey

The first step in any landforming operation is a field or drain survey. Our easy-to-use package makes it simple to collect either full field or ditch and drain surveys. After surveying you can quickly transfer your projects to any other T3RRA software packages.

Dirt moving starts with a survey

T3RRA Survey allows you to carry out surveys without tying up your existing earthmoving software and equipment.

Features

- Perform both drain and field surveys.
- Differently shaped points for drains and fields.
- Edit points in the field.
- Surveyed maps can be viewed in 2D and 3D.
- Create elevation surfaces that are design ready.
- Drop markers at points of interest.

Benefits

- Saves both time and money.
- Works with John Deere and third-party RTK GPS.
- Can be installed on any vehicle.
- If you know our other products, you know T3RRA Survey.
- Data can be easily imported to other T3RRA software.
- No data lock in.
- Export to generic file types.

About T3RRA

Rooted in agriculture, we are an innovative agile company that develops easy-to-use, powerful software that just works. Founded by 5 partners who have 125 years of agtech experience between them, we are dedicated to meeting the needs of farmers across the globe.
